

The call is now open for the 2nd SUSTAINABLE WATERSHED MANAGEMENT CONFERENCE
22 - 25 April, 2013 Hilton Dalaman, Sarigerme, TURKEY

Key issues covered by the conference are:

- Good watershed management practices: Examples from various countries including climate change challenges and trans-boundary problems
- Decision support tools: Monitoring, GIS, data / information management, indicators, ecological economics, cost/benefit analysis, decision making models, legislation and policies, participatory methods / water user partnerships
- Models: Integrated watershed model applications for watershed management
